MAP OF THE WORLD.

By G. R. PARKIN, M. A., LL. D.

Principal of Upper Canada College, Toronto, and formerly Principal of the Collegiate School, Fredericton, N. B.

AND

J. G. BARTHOLOMEW, F. R. G. S.

SIZE 8 FEET BY 5 FEET.

Mounted on Cloth, Varnished, and with Rollers.

PROSPECTUS.

THIS Map has been designed to indicate with as much distinctness as possible the geographical position of the various parts of the British Empire, and their relation to each other for purposes of commerce and defence.

SPECIAL FEATURES OF THE MAP.

1. All the territories of the Empire have a conspicuous and uniform coloring. Spheres of influence are distinguished by a lighter shade of the same color.

2. Prominence is given to the illustration of the great trade routes, and of the coaling and naval stations which give these routes security, and form connecting links around the world.

3. By repeating Australia and the countries of the Far East, the approach to them by the Western as well as by the Eastern route is shown, and thus the continuity of maritime connection around the Empire is illustrated more fully than in ordinary maps.

4. The relation of Canada to the Empire is also thus shown most effectively, and the Map was used at the Ottawa Conference of 1894 in the discussions on steamship and cable routes.

5. An inset Map shows the system of telegraphic and cable communication between Canada and all other parts of the world.

SPECIAL PRICE $5.00.

A Remarkably Cheap Map for School Rooms, Counting Houses, etc.

To enter Portsmouth harbor get Portsmouth light to bear N ¾ W, and run for it until Whale's Back light bears S E by E and you are abreast the southern end of Wood Island, then steer N ½ E until past Fort Point, and Portsmouth lighthouse bears W by S ½ S, then steer N W until the light bears S by E, and anchor; or, when Portsmouth light bears S by E, steer S W ¾ S, and anchor close in shore in the cove to the westward of Fort Constitution in from 2½ to 6 fathoms. Strangers in entering Portsmouth harbor should take a pilot if possible.

Newburyport Harbor Light; white tower; fixed white light, visible 12½ miles. Also, a beacon, range of light, 336 feet in front of main light; black and white tower; fixed white light, visible 8 miles. These lights, in range, guide across the bar, in best water; bar constantly changes; outer bar buoy is in range with inner bar buoy and both lights; the beacon is moved as the channel changes. This station is on the north end of Plum Island, and on the south side of entrance to the Merrimac River, Mass. (Strangers should not attempt to enter.)

To cross the bar, bring the light to bear south and run for it, leaving it on the port side; then run for the Lobster Rock Beacon, and leave it on the port side also.

Straitmouth Island; on south side of Sandy Bay, entrance to Rockport harbor; white tower; fixed white light, visible 11 miles; to be left on port hand in going to Rockport. Bad ledges lie off this light. Strangers should keep the north shore of Sandy Bay best aboard on entering Rockport; shelter only for a few small vessels.

Cape Ann Lights; latitude 42° 38m 13s; longitude 70° 34m 32s W; two grey granite towers, 165 feet above sea level; fixed white light, visible 19 miles; the lights are 900 feet apart, in range at S S W and N N E; located on Thatcher's Island off Cape Ann, and the northern limit of Massachusetts Bay; to be left on the starboard hand in going towards Boston. Gloucester Light, on Eastern Point; on east side of entrance to Gloucester harbor; white tower; a flashing red light, showing once every 5 seconds, visible 13 miles. When coming from the Eastward, bound into Gloucester harbor, give the light a good berth to clear Eastern Point Ledge (spar buoy); then, when the light bears N E ¾ N, run N W ½ N until the upper harbor light bears N E by N ½ N, then run for it, and anchor ½ mile S by W from the light. Also, a bell struck by machinery, a double blow every 20 seconds.

Whistling Buoy off Eastern Point—Changed to and off Thatcher's Island. Thatcher's Island bearing NW by W about 2¾ miles.

Gloucester Harbor Light, on Ten Pound Island, east side of entrance to inner harbor; brown tower; flashing white light every 5 seconds; visible 12 miles; to enter harbor, bring this light to bear N E by N ½ N, and run for it until Eastern Point Light bears S S E, and anchor in channel way or continue until Eastern Point light bears S, then steer E N E until Ten Pound Island light bears N, and anchor in S E harbor, in from 4 to 6 fathoms—hard mud; or, from this point steer about N W by N between Ten Pound Island Ledge buoy and Ten Pound Island (giving the point of the Island a good berth), until the light bears E, then steer N ½ E until the light bears S by E, and anchor in western harbor.

keep the lowest light open to the east of the high light, and run for it; this guides to the eastward of the South-east Breakers and Searl's Rock. Give Baker's Island a berth of not less than half a mile, leaving it on the port hand, then run for Hospital Point Light, bearing about W by N ½ N, until Derby Wharf light is in range with Fort Pickering light, when Salem harbor will be to the W S W of you, and Beverly harbor W by N ½ N. Also, a bell struck by machinery, a single and a double blow alternately, intervals 30 seconds. For better information, a lens panel has been placed in "Hospital Point" Light, which makes a more brilliant light in the line of the ships' channel from Baker's Island than on either side, and serves to keep vessels from danger on either side.

Hospital Point; white tower; fixed white light, visible 13¾ miles; on Hospital Point, north side of entrance to Salem and Beverly Harbor.

Fort Pickering Light; brown tower; fixed white light, visible 10½ miles; on Winter Island, north side of entrance to Salem harbor. Davis' Ledge Buoy bears E by S; Boston light bears N W ½ W. 7 miles. This course must be kept good, northerly, to pass Bell Boat, off the north side of the Harding's Ledge (about 4¾ miles from Minot's Ledge Light). A good mark to clear the Harding's Bell Boat, after passing Minot's light, is to keep Long Island Head light (fixed white) just open to the north of the Narrows Light, which is a red light.

Nix Mate Light Buoy.—A gas buoy, painted black and showing a fixed white light, just inside of Nix Mate bell buoy, entrance to Boston harbor, Mass. If the ice runs strongly, this and similar buoys in the entrances to Boston harbor will be taken up.

Harang Ledge and Centurion Rocks.—A light buoy, painted black and showing a fixed white (gas) light, was placed just inside of Harding Ledge bell buoy, entrance to Boston harbor. The light buoy is moored in 48 feet of water, on the following bearings: Minots Ledge lighthouse S 58° 30′ E true

(S E ¼ E mag); Harding Ledge beacon S 41° W true (S W ¾ W mag); Boston lighthouse N 60° W true (N W ¼ W mag). North end of Centurion buoy a light buoy, painted black, numbered 5, and showing a fixed white (gas) light.

Boston Light; latitude 42° 19m 41s N; longitude 70° 53m 26s W; on Little Brewster Island, north side of entrance to main ship channel to Boston; white tower; white flash light, flashing once every half minute, visible 15¾ miles. First-class steam siren; blasts 5 seconds, alternate silent intervals of 10 and 40 seconds. From Cape Cod highlands the course for Boston Light is N W by W ¼ W, which well clears Minot's Ledge and the Hardings; then, when well past Minot's, bring Boston light to bear W by N ½ N and run for it until within ⅛ of a mile of it or until the Beacon light bears about W by N, then run W ¼ S until the Beacon light bears W N W, then run W by N leaving the Beacon light 100 yards on your starboard hand, then steer N W ¼ W (keeping the middle of the channel) for the Narrows between Galloups and Lovell's Islands, then about N W ¾ N for the bell buoy off Nix's Mate, which leave on port hand, then run W by N ¼ N for Fort Independence, leaving the lower middle buoy, red can, No. 6, a good berth on your starboard, and State Ledge buoy, red Nun No. 8 close aboard on your starboard; then run about N W ¼ N for the upper middle buoy, black Nun No. 9, which leave on your port, then the course to Long Wharf or to good anchorage is about N W ¼ W. If making Boston ship channel from Cape Ann, get Thatcher's Island light to bear N N W from 2 to 3 miles, then steer S W ¼ W until Boston light bears W by N ½ N. Then proceed as before given.

Narrows Light; black lantern on white hexagonal dwelling, pile foundation; fixed red light, visible 8½ miles; on the right hand side of Narrows, in Ship Channel entrance to Boston harbor; also, a bell struck by machinery every 20 seconds.

Deer Island Light; on the south extremity of the Spit, making out ¼ mile to the southward from Deer Island entrance to Boston Harbor; fixed white, varied by a red flash every 30 seconds; also a bell struck by machinery every 10 seconds in foggy weather.

Long Island Light; on the N E end of Long Island and southern side of entrance to Boston inner harbor: brown tower; fixed white light, visible 16¼ miles. In coming up ship channel, and after leaving Nix's Mate buoy on the port hand, and Long Island Light bears W by S ½ S, run W by N ¼ N for the south end of the Castle until the Castle North Wharf bears N W by W ¾ W, or abreast of the State Ledge Buoy (red, No. 8), then N W ¼ N to the Upper Middle Buoy (black, No. 9), which leave on port hand, then the course to Long Wharf is N W ¼ W. But if approaching Boston from Cape Ann, via Broad Sound, bring Long Island Light to bear S W by W, and run for it until Deer Island Point Beacon bears N W by N ½ N, three-eighths of a mile distant, then W by N ¼ N up the harbor. Strangers should bear in mind that in the middle of Broad Sound there is but 8 feet of water at low tide; but by keeping on the southern side of the Sound, leaving the Graves Whistling Buoy ½ a mile on your port hand and the Devil's Limb Buoy (black can No. 1) ⅓ mile on port hand, and running straight to Ram's Head buoy (black can buoy No. 5) about W S W, passing Aldrich's Ledge buoy (black can No. 3) ¼ mile on port, then leaving Ram's head 50 yards distant on port, and run about W ¼ S to clear Deer Island Point Beacon, you can carry 12 feet safely. From the Beacon you will steer W ¾ N for lower middle buoy, then W by N ¾ N for State Ledge Buoy, when proceed as before given.

(*a*) The expression "vessel" includes every description of vessel used in navigation;

(*b*) The expression "ship" includes every description of vessel not propelled by oars;

(*c*) The expression "steam-ship" or "steam-boat" includes every vessel propelled wholly or in part by steam or by any machinery or power other than sails or oars;

(*d*) The expression "ordinary practice of seamen," as applied to any case, means and includes the ordinary practice of skilful and careful persons engaged in navigating the waters of Canada in like cases;

(*e*) The expression "owner" includes the lessee or charterer of any vessel having the control of the navigation thereof. 43 V., c. 29, s. 3.

REGULATIONS FOR PREVENTING COLLISIONS AND FOR DISTRESS SIGNALS.

2. The following rules with respect to lights, fog signals, distress signals, steering and sailing and rafts shall apply to all the rivers, lakes, and other navigable waters within Canada, or within the jurisdiction of the Parliament thereof, that is to say:

Preliminary.

In the following rules every steam-vessel which is under sail and not under steam is to be considered a sailing vessel; and every vessel under steam, whether under sail or not, is to be considered a steam-vessel.

The word "steam-vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules, when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, etc.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

Article 1. The rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

Art. 2. A steam-vessel when under way shall carry:

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the forepart of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light, so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(*c*) On the port side, a red light so constructed as to show an unbroken light

AND UPPER LEATHER, SHOEMAKERS' TOOLS AND FINDINGS.

over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(*e*) A steam-vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

Art. 3. A steam-vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam-vessel may carry a small white light abaft the funnel or after-mast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

Art. 4. (*a*) A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and, if a steam-vessel, in lieu of that light, two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all around the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam-vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all around the horizon at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in color, and the middle one diamond in shape and white.

(*c*) The vessel referred to in this article when not making way through the water, shall not carry the side-lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this article are to be taken by other vessels as signals that the vessel showing them is not under command, and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

Art. 5. A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Art. 2 for a steam-vessel under way, with the exception of the white lights mentioned therein, which they shall never carry.

C. E. BRACKETT, 86 PRINCESS STREET, ST. JOHN, N. B.

LUBRICATING OILS, MACHINISTS' TOOLS, MILL AND STEAMBOAT

Art. 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than two points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the color of the light they respectively contain, and shall be provided with proper screens.

Art. 7. Steam-vessels of less than 40, and vessels under oars or sails of less than 20 tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*) (*b*) and (*c*), but if they do not carry them they shall be provided with the following lights:

1. Steam-vessels of less than 40 tons shall carry,—

(*a*) In the forepart of the vessel, or on or in front of the funnel, where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.

(*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steam-boats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to the other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars or sails, shall have ready at hand a lantern showing a white light which shall be temporarily exhibited in sufficient time to prevent collision. [The vessels referred to in this article shall not be obliged to carry the lights prescribed by Art. 4 (*a*) and Art. 11, last paragraph.]

Art. 8. Pilot vessels, when engaged on their station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all around the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes. On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show a white light instead of carrying it at the masthead, and may, instead of the colored lights above mentioned, have at hand ready for use a lantern with a green glass on one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

DYEING AND CLEANING WEARING APPAREL,

SUPPLIES AT J. HORNCASTLE & CO.'S, 22 and 46 MAIN STREET, St. John.

Art. 9. Fishing boats shall show such lights as are prescribed for vessels of their tonnage, and shall be under such further regulations as may be adopted for their protection.

Art. 10. A vessel which is being overtaken by another shall show from her stern to such last mentioned vessel a white light or a flare-up light.

The white light required to be shown by this article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least one mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

Art. 11. A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all around the horizon at a distance of at least one mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40 feet above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing on her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

Art. 12. Every vessel may, if necessary, in order to attract attention, in addition to the lights which she is by these rules required to carry, show a flare-up light, or use any detonating signal that cannot be mistaken for a distress signal.

Art. 13. Nothing in these rules shall interfere with the operation of any special rules made by the government of any nation with respect to additional station and signal lights for two or more ships of war, or for vessels sailing under convoy, or with the exhibition or recognition signals adopted by shipowners, which have been authorized by their respective governments and duly registered and published.

Art. 14. A steam-vessel proceeding under sail only, but having her funnel up, shall carry in day-time, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

Sound Signals for Fog, etc.

Art. 15. All signals prescribed by this article for vessels under way shall be given:

1. By "steam-vessels" on the whistle or siren.
2. By "sailing vessels and vessels towed" on the fog-horn.

The words "prolonged blast," used in this article, shall mean a blast of from 4 to 6 seconds duration.

A steam-vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell. A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell. In fog, mist, falling snow, or heavy rain storms, whether by day or night, the signals described in this article shall be used as follows, viz.:

C. E. BRACKETT, 86 PRINCESS STREET, ST. JOHN, N. B.

Shoes of all Kinds, WATERBURY & RISING, 61 King and 212-214 Union Sts.

(*a*) A steam-vessel having way upon her shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam-vessel under way, but stopped and having no way upon her, shall sound at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about one second between them.

(*c*) A sailing vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack, 1 blast, when on the port tack 2 blasts in succession, and when with the wind abaft the beam, 3 blasts in succession.

(*d*) A vessel when at anchor shall, at intervals of not more than 1 minute, ring the bell rapidly for about 5 seconds.

(*e*) A vessel, when towing a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules, shall, instead of the signals prescribed in sub-divisions (*a*) and (*c*) of this article, at intervals of not more than 2 minutes, sound 3 blasts in succession, viz.: 1 prolonged blast, followed by 2 short blasts. A vessel towed may give this signal, and shall not give any other.

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

Speed of Ships to be Moderate in Fog, etc.

Art. 16. Every vessel shall, in a fog, mist, falling snow, or heavy rain-storms, go at a moderate speed, having careful regard to the existing circumstances and conditions.

A steam-vessel hearing, apparently forward of her beam, the fog-signal vessel the position of which is not ascertained, shall, so far as the circumstan of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

STEERING AND SAILING RULES.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

Art. 17. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.:

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close hauled.

(*b*) A vessel which is close hauled on the port tack shall keep out of the way of a vessel which is close hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to the windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

Art. 18. When two steam-vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This article only applies to cases where vessels are meeting end on, or nearly

end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases, in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night, to cases where the red light of one vessel is opposed to the red light of the other or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 19. When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Art. 20. When a steam-vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam-vessel shall keep out of the way of the sailing vessel.

Art. 21. Where by any of these Rules one or two vessels is to keep out of the way, the other shall keep her course and speed.

NOTE.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert the collision. (See Articles 27 and 29.)

Art. 22. Every vessel which is directed by these Rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Art. 23. Every steam-vessel which is directed by these Rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Art. 24. Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than 2 points abaft her beam, *i. e.*, in such a position, in reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel, and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Art. 25. In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such vessel.

Art. 26. Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets, or lines, or trawls. This Rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

Art. 27. In obeying and construing these Rules, due regard shall be had to

all dangers of navigation and collision, and to any special circumstances which may render a departure from the above Rules necessary in order to avoid immediate danger.

Sound Signals for Vessels in Sight of One Another.

Art. 28. The word "short blast" used in this article shall mean a blast of about 1 second's duration.

When vessels are in sight of one another, a steam-vessel under way, in taking any course authorized or required by these Rules, shall indicate that course by the following signals on her whistle or siren, viz.:

One short blast to mean "I am directing my course to starboard."

Two short blasts to mean "I am directing my course to port."

Three short blasts to mean "My engines are going full speed astern."

No Vessel, under Any Circumstances, to Neglect Proper Precautions.

Art. 29. Nothing in these rules shall exonerate any vessel, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbors and Inland Navigation.

Art. 30. Nothing in these Rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbor, river, or inland waters.

Distress Signals.

Art. 31. When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her either together or separately, viz.:

In the day time—1. A gun or other explosive signal fired at intervals of about a minute. 2. The International Code signal of distress, indicated by N.C. 3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball. 4. A continuous sounding with any fog-signal apparatus.

At night—1. A gun or other explosive signal fired at intervals of about a minute. 2. Flames on the vessel (as from a burning tar-barrel, oil-barrel, etc.) 3. Rockets or shells, throwing stars of any color or description, fired one at a time, at short intervals. 4. A continuous sounding with any fog-signal apparatus.

Two Steamships Meeting.

When all three lights I see ahead,
I port my helm and show my RED.

To Steamships Passing Clear.

GREEN to GREEN or RED to RED—
Perfect safety—go ahead!

Two Steamships Crossing.

NOTE.—This is the position of greatest danger; there is nothing for it but good look out, caution, and judgment, with prompt action.

All ships must keep a good look-out, and steamships must stop and go astern if necessary.

If to my Starboard RED appear,
It is my duty to keep clear—
To act as judgment says is proper—
To Port—or Starboard—Back—or Stop her.

But when upon my Port is seen
A Steamer's Starboard light of GREEN,
There's naught for me to do but see
That GREEN to port keeps clear of me.

General Caution.

Both in safety and in doubt
I always keep a good look-out;
In danger, with no room to turn,
I ease her!—Stop her!—Go astern!

CANADIAN STORM WARNINGS.

ISSUED FOR QUEBEC AND THE MARITIME PROVINCES.

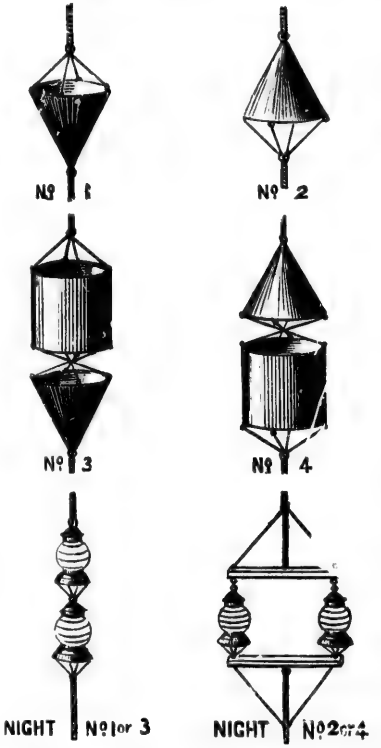

Fig. No. 1 — This signal indicates "moderate gale is expected at first from an easterly direction."

Fig. No. 2 — This signal indicates "moderate gale is expected at first from a westerly direction."

Fig. No. 3 — This signal indicates "fresh to heavy gale is expected at first from an easterly direction."

Fig. No. 4 — This signal indicates "fresh to heavy gale is expected at first from a westerly direction."

The Cone, when hoisted by itself, indicates that it is expected that the wind will attain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinarily well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicularly.

Night signal corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

Note 1 — Mariners will be able to obtain further information from Storm Signal Agents, or by consulting the daily probabilities.

Note 2—Mariners must always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

Morning and Evening Stars.

VENUS is a morning star until February 15th, when she is in superior conjunction with the sun, then an evening star until December, and a morning star for the remainder of the year.

MARS is a morning star throughout the year.

JUPITER is a morning star until March 25th, when he is in opposition to the Sun, then an evening star until October 13th, and a morning star for the remainder of the year.

Explanatory.

Annular Eclipse—An eclipse of the Sun, in which its whole disk is covered by the Moon, except a bright outer ring.

Aphelion—The point of a Planet's orbit farthest from the Sun.

Apogee—That part of the Moon's orbit farthest from the Earth.

Astronomical Day is reckoned from noon to noon through the 24 hours. Thus, July 21, 9h., is 9h. A. of July 21, and July 21, 15h., is 3h. M. of July 22.

Conjunction—A Planet directly between the Earth and the Sun is said to be in Inferior Conjunction with the Sun. A Planet with the Sun directly between it and the Earth is said to be in Superior Conjunction with the Sun. Planets are said to be in conjunction with each other, or with the Moon, when they are in the same sign and degree.

Declination—The distance of a heavenly body from the Equinoctial, measured north or south, in degrees or minutes, on a Meridian.

Ecliptic—The plane of the Earth's orbit, so called because Eclipses can take place only when the Moon is on or near it.

Elongation—The distance of a Planet from the Sun as seen from the Earth.

Equinoctial—The circle in the heavens traced by the Earth's Equator.

Node—That part of the orbit of a heavenly body which intercepts the Ecliptic. If the body is passing from south to north, it is called the Ascending Node; if from north to south, Descending.

Opposition—A Planet with the Earth directly between it and the Sun is said to be in opposition to the Sun.

Penumbra—That portion of space around the shadow of the Earth, in passing through which the Moon diminishes in brightness in consequence of a part only of the Sun's rays reaching her surface.

Perigee—That part of the Moon's orbit nearest to the Earth.

Perihelion—That part of the Planet's orbit nearest to the Sun.

Quadrature—Two heavenly bodies are said to be in Quadrature when they are distant from each other by one-fourth of the Zodiac, or three signs apart.

The Sun's Declination and fast or slow of clock are given for apparent noon or time of passing the Meridian of St. John.

The Moon's Southing is given in Astronomical time for the Meridian Passage at St. John; and her Declination, when on the Meridian.

The Rising and Setting of the Moon are given for every day in the year.

To find the length of the day, subtract the time of sunrise from 12 hours, and to the difference add the time of sunset.

To find the length of the night, subtract the time of sunset from 12 hours, and to the difference add the time of sunrise next morning.

Tides.

When the Moon is near the Full, and change, the Tides rise higher than usual—these are called Spring Tides; and when the Moon is near her first and third quarters the Tides rise less than usual—these are called Neap Tides. If the Moon near the full or change is in her Perigee, or nearest approach to the Earth, it will be very high tides, and if at that time she is in her Apogee, or farthest distance from the Earth, the Tides will flow much less.

On account of the disturbing force of the winds it is not possible at times (by astronomical calculations) to predict the exact time and height of high and low water; when the winds blow strong on shore, the effect is to increase the Tides and make them later, but when the winds blow off shore, the effect is to diminish them and make them earlier.

The Tides in the Calendar are the Morning and Afternoon Tides at St. John and Charlottetown. In the Tide Table (page 59) will be found Constants for finding the time of High Water at each of the places given in the table.

It will sometimes be found that when a Constant is added to the time of High Water at the port of reference the sum exceeds 12 hours; in this case subtract 12 hours from the sum and the remainder will be the time of High Water at the required port on the succeeding afternoon or morning, according as the Tide at the port of reference was a Morning or Afternoon Tide.

EXAMPLE.

High Water at St. John, January 8th	11h. 34m. M.
Moncton, add	54m.
	12h. 28m.
Subtract	12h. 00m.
High Water at Moncton, January 8th	0h. 28m. A.

It will sometimes be found that a Constant to be subtracted is greater than the time of High Water at the port of reference; in this case add 12 hours to the time at the port, subtract the Constant, and the remainder will be the time of High Water at the required place for the previous Morning or Afternoon, according as the Tide at the port of reference was an Afternoon or Morning Tide.

EXAMPLE.

High Water at Charlottetown, January 11th	0h. 50m. A.
Add	12h. 00m.
	12h. 50m.
Newcastle, Beaubére Island, subtract	4h. 15m.
High Water at Beaubére Island, January 11th	8h. 35m. M.

Forecasting the Weather.

Men have, from a very early period, studied the weather, on account of its great influence on their pursuits, in order, if possible, to predict its nature, and prevent those losses to the farmer and the sailor which result from violent storms.

The earlier students based their predictions on the phases of the moon, but an examination of the Greenwich observations for more than half a century has shown that this theory is entirely unfounded. Weather prophets like Moore, Zadkiel and Vennor claim in their almanacs to be able to forecast the weather day by day for a whole year; but meteorological science in the British Isles, and the Signal Service of the United States, with the Weather Bureau of the Dominion, does not claim to forecast, with any certainty, the weather for more than three or four days at the most.

If an observer could obtain, at regular or repeated intervals, readings of the barometer at stations distributed over a large area, he would be enabled to trace the march of the storm, for it has been found that the wind always blows towards the place of the lowest barometer reading; and so, by means of the telegraph, he may warn those places the storm is approaching. Still, mistakes are often made, and the forecasts are not always infallible, so that much remains to be done before meteorology can be marked among the exact sciences.

Tide Table.

The time of high water in the following places will be found approximately by adding to or subtracting from the time of high water at the given port of reference, as follows:

To Find the Latitude by a Meridian Altitude of the Sun.

The Sun's Declination in the Calendars of the Month are for the Meridian of St. John, N. B., but will serve with sufficient accuracy to obtain the Latitude by Meridian Altitude of the Sun on any part of the coast of New Brunswick and Nova Scotia, and on the coast of Maine and Massachusetts, in the United States.

LIME, BRICK, CEMENT, PLASTER, HAIR, AT HORNCASTLE'S.

Rule.—At noon obtain the altitude of the Sun by a sextant or quadrant; add 12 miles to that altitude to obtain the true altitude; subtract the true altitude from 90° 0′, and you will have the Sun's Zenith distance, which you will name North, as the Sun will always bear to the South at noon on that coast. Under the Zenith distance place the Sun's Declination for that day. Then if the Declination and Zenith distance are of different names, their *difference* will be the Latitude; if they are of the *same* name, their *sum* will be the Latitude.

Example.—1898, February 3rd, at noon, off Cape Sable, N. S., the observed altitude of the Sun was 30° 20′, bearing South. Required the ship's latitude.

Observed Altitude	30°	20′	S.

Zenith distance	59	28	N. } Different

Latitude	43	05	N.

Example 2.—1898, April 7th, at noon, off Mt. Desert Rock, coast of Maine, U. S., the observed altitude of the Sun was 52° 52′, bearing South. Required the ship's latitude.

Observed Altitude	52°	52′	S.

ROCK WALL PLASTER.

ROCK WALL PLASTER is a substitute for ordinary Lime Mortar, and when applied to ceilings or walls does not fall, does not of itself crack, and is, by actual test, 400 times stronger than ordinary lime and sand plaster.

Also, a convenient wall plaster for farmers and others living in localities distant from central markets, where lime, hair, etc., necessary for use in making ordinary mortar, cannot be procured without considerable delay.

ROCK WALL PLASTER is put up in bags of 100 lbs. each, and is ready for applying to walls by the simple addition of sand and water.

ROCK WALL PLASTER saves time, admits of carpenters immediately following the plasterers, giving the owner his building weeks earlier than with ordinary plaster.

HAVE YOU A COLD? USE HIGGINS' BRITISH LINIMENT.

Matter Which Cannot be Forwarded Through the Post.—Any explosive substance, glass, liquid, or other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Letters containing gold or silver money, jewels, or precious articles, or anything liable to Customs duties, cannot be forwarded by post to any of the Postal Union countries except the United States.

Important.—A letter once posted becomes the property of the person to whom it is addressed, and must be forwarded according to its direction. On no application, however urgent, can it be delivered back to the writer, or to any other person.

To enclose writing, intended to serve the purpose of a letter, in a newspaper packet or in a parcel, is an offence punishable by a fine of from $10 to $40.

Sale of Postage Stamps.—Any person, other than a Postmaster, who engages in the sale of Postage Stamps or Stamped Envelopes, without being duly licensed by the Postmaster General, is liable, on conviction before a Justice of the Peace, to a penalty of $40 for each offence.

Request Letters.—Unregistered letters from places in Canada, Newfoundland and United States, enclosed in envelopes having *printed thereon* a request that the letters be returned to the sender if not delivered within a certain specified time, will be returned as requested, if not delivered at the time stated.

Useful Hints.

Never send money or other articles of value through the Post Office except either by Money Order or Registered Letter.

Make complaints and inquiries in writing.

Envelopes closed and simply clipped at the ends cannot be forwarded by Book Post. Affix stamps securely, and on the upper right hand corner.

Register all valuable letters.

Send money by Money Order whenever practicable.

Preserve, and request correspondents to preserve, envelopes of mis-sent or delayed letters.

Business men should be careful to authorize but a limited number of persons to receive their letters, and only those in whom they have full confidence.

Have a letter box on the door of residence and office.

Letters addressed to mere initials, or fictitious names, will not be delivered, unless addressed in care of a resident, or to some box in the Post Office.

Mutilated Stamps.

Letters having mutilated stamps, or stamps so soiled and defaced as to make it impossible for the sorting clerks to decide whether they have been used before or not, will be sent to the Postmaster General for his adjudication; and if it can be shown that such stamps had been previously used, the offender will be liable to a fine of from $10 to $40.

Post Bands and Stamped Envelopes.

One cent post bands for newspaper or book packet wrappers; and one and three cent stamped envelopes and two and three cent letter cards are issued by the Department, and may be had at the stamp vendors at a trifle above their face value.

Merchants' Boxes.

Rent of small box $4, and of large box $6 a year.

Though every effort will be made in sorting letters to place them in the boxes, when the party addressed is known to have a box, the Postmaster does not hold himself responsible for this always being done, the primary rules

being that all letters bearing the number of the house and name of street go there by the letter carrier. An order to place in a box letters belonging to another person than the owner of the box, cannot be recognized unless such letters are addressed to the care of the box or its owner. Letters for a member of a firm should be addressed to the care of the firm or the number of the box. Box-holders would facilitate the work of sorting by requesting correspondents to add the box number to the address of their letters.

St. John Letter Carriers' Delivery.

Letters and Papers should be addressed to Street and Number. Change of residence should be promptly notified to the Postmaster. Two deliveries daily, at 7.30 a. m. and 3 p. m. On public holidays there is no afternoon delivery.

Letters not bearing the name and number of street, addressed to parties whose address may be known to the Carriers, will be delivered by them. It is always best, however, to have name of street and number of house supplied.

Time Ball, Customs Building.

The Ball will be hoisted half its elevation each day (Sunday excepted) at fifteen minutes before one o'clock. At one minute before one o'clock it will be hoisted its full height; and at one o'clock, mean time, the Ball will be dropped. A chronometer keeping correct Greenwich time should then show 5h. 24m. 16s., and the difference between this and the time shown by a chronometer is its true error on Greenwich time at the moment. As the above hour of one o'clock, when the ball drops, represents 5h. 24m. 16s. at Greenwich, the error of a chronometer may be ascertained, no matter where the ship is lying. Masters of vessels arriving at St. John should compare their chronometers by the Time Ball, as it will enable them to get the sea rate, which frequently varies from harbor rates. Latitude 45° 16′ 42″ North. Longitude in time 4h. 24m. 10s. west of Greenwich.

NOTHING LIKE IT—HIGGINS' BRITISH LINIMENT.

Synopsis of Fishery Laws and Regulations in Force in New Brunswick.

The Surveyor General, his Deputy or other officer under him, duly authorized to that effect, may grant leases conveying the exclusive right to fish with the rod and line in the manner known as "surface fly fishing" in front of the ungranted Crown Lands of the province, in either rivers or lakes.

Said leases may be granted for any period up to ten years, excepting on the Restigouche river, where they are for five years.

Permits may be similarly granted after the first day of June in each year for fishing in any waters adjoining ungranted Crown Lands not under lease, but such permits shall not run for any term greater than the remainder of the fishing season.

Penalties up to twenty dollars are imposed upon persons who trespass upon the fishing rights of any lessee of government fishing privileges.

Leases of government fishing privileges embrace the soil right for a width of four rods from the banks of rivers and shores of lakes.

Leases cannot be transferred or sub-let without the consent of the Surveyor General.

Every lessee is required to maintain one or more competent guardians within the bounds of his lease. These are duly sworn and commissioned by the Surveyor General.

Fishery guardians are, also, *ex officio* game wardens.

Lessees are answerable for their own carelessness or that of their guardians or other employes, should fires be caused thereby, damaging lands or timber growing thereon.

The Fishery Commissioner has the general overseeing of the provincial fisheries, and is *ex officio* a Justice of the Peace for the purpose of dealing with violations of the fishery laws. He is also a game warden for the whole province, with the same rights, powers and duties as county game wardens.

The following provisions are contained in Acts or Orders-in-Council of the Dominion:

The use of explosive material to catch or kill fish is prohibited.

The use of fire-arms of any kind for the purpose of killing fish is prohibited.

Dominion Order-in-Council of March 25th, 1896, provides as follows:

Fishing for speckled trout (*Salvelinus fontinalis*) through the ice is prohibited in Canada—

Provided, That in the province of Nova Scotia, New Brunswick and Prince Edward Island, such fishing for trout of all kinds may be allowed after the expiry of the close season, under special permit issued by the Minister of Marine and Fisheries for a period not exceeding ten days, on condition that trout so caught under such special permit are obtained for domestic use only, and not used for commercial purposes.

The fee for each such special permit is hereby fixed at fifty cents.

Dominion Regulations of 18th July, 1889, Sec. 7, provide as follows:

(*d*) All salmon nets shall have the name of the owner or owners legibly marked on two pieces of wood or metal attached to the same; and such mark shall be preserved on such nets during the fishing season, in such manner as to be visible without taking up the net or nets; and any net used without such mark shall be liable to forfeiture.

(*e*) From the time of low water nearest six o'clock in the afternoon of every Saturday, to the time of low water nearest six o'clock in the forenoon of every Monday, no one shall fish for, catch or kill salmon in tidal waters.

(*f*) In non-tidal waters frequented by salmon, no one shall fish for, catch or

kill salmon, or any other fish, between nine o'clock in the evening of every Saturday and six o'clock on the following Monday morning.

Sub-section 9, Section 8 of the Dominion Fisheries Act prohibits the capture of salmon within 200 yards of the mouth of any tributary, creek or stream which salmon frequent to spawn.

Sub-section 8 of Section 14 of the Dominion Fisheries Act prohibits the killing of salmon, trout, etc., by means of spear, grapnel-hooks, negog or nishagons.

Sub-section 18, Section 5 of amendment to Dominion Fisheries Act, Chap. 51, passed 22nd July, 1894, is as follows:

The catching of fish for the purpose of using it as manure is prohibited.

Penalties ranging from $20 and costs to $100 and costs are imposed by Sub-section 2 of Section 1 of Dominion Act, 1895, Chap. 27, for the pollution of waters by lime, chemical substances, drugs, poisonous matter, dead or decaying fish or remnants thereof, etc., in any waters frequented by fish mentioned in the Fisheries Act.
